

## Convoys

Convoys from Earth to French Arm colonies leave Earth and all follow a path through Nyotekundu, Bessieres, Neubayern (not shown on your Map Boards), Augereau, Queen Alice's Star and Kimanjano. These convoys are lightly escorted, as the perceived threat of a Kafer attack is very low.

From Kimanjano, they tend to split into three paths depending upon their final destination. One branch goes to Beta Canum Venaticorum (Beta Canum). Most of these convoys finish there, but some ships pass on through DM +36 2219 to Vogelheim. These too are lightly escorted (for now).

The second path goes to Beta Comae Berenices, Dunkelheim, Hochbaden and finally on to Eta Bootis. These are escorted with whatever forces can be spared.

The final path goes to Henry's Star, 61 Ursae Majoris and finishes at Xi Ursae Majoris. These are lightly escorted.

Ships that reach their final destination then turn around and follow the same path back.

Convoys from Earth to Kimanjano are given a convoy number prefixed with EK (eg EK12 is the 12th convoy of the year). Those returning get a KE prefix. Convoys to Beta Canum get a KB prefix and the return convoy gets a BK prefix. Convoys that carry on to Vogelheim get a BV prefix and those returning get a VB prefix.

Convoys from Kimanjano to Eta Bootis get a KEB prefix and the returning convoys get an EBK prefix.

Finally, convoys to Xi Ursae Majoris get a KXM prefix and those returning get a XMK prefix.

All convoys get a suffix of F or S depending upon whether they are a Fast (1.55 Warp) or Slow (0.51 Warp) convoy.

Of course these are not the only ships likely to be encountered. There are also military vessels of the 19 star-faring nations, couriers and merchants that refuse to travel within the convoy system. Naturally, schedules for these are not available.
