

## Tutorial 5

---

## Calculations – Some Pointers

---

- Units
  - Must be consistent
  - Use SI units
- Show working
  - Shows how you approached question
  - If method OK you'll get marks even if the answer is not correct
- Check

## SI Units

- *Le Système International d'Unités*
- Base units
- Derived units
- See <http://physics.nist.gov/cuu/Units/>

## SI Base Units

|                           |            |     |
|---------------------------|------------|-----|
| length                    | metre      | m   |
| mass                      | kilogramme | kg  |
| time                      | second     | s   |
| electric current          | ampere     | A   |
| thermodynamic temperature | kelvin     | K   |
| amount of substance       | mole       | mol |
| luminous intensity        | candela    | cd  |

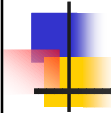

## SI Derived Units

|                 |                          |                 |
|-----------------|--------------------------|-----------------|
| area            | square meter             | $\text{m}^2$    |
| volume          | cubic meter              | $\text{m}^3$    |
| speed, velocity | meter per second         | $\text{m/s}$    |
| acceleration    | meter per second squared | $\text{m/s}^2$  |
| mass density    | kilogram per cubic meter | $\text{kg/m}^3$ |
| current density | ampere per square meter  | $\text{A/m}^2$  |
| luminance       | candela per square meter | $\text{cd/m}^2$ |

## SI Derived Units

|                     |        |    |                         |   |
|---------------------|--------|----|-------------------------|---|
| force               | newton | N  | -                       | $\text{m}\cdot\text{kg}\cdot\text{s}^{-2}$      |
| pressure, stress    | pascal | Pa | $\text{N/m}^2$          | $\text{m}^{-1}\cdot\text{kg}\cdot\text{s}^{-2}$ |
| energy, work,       | joule  | J  | $\text{N}\cdot\text{m}$ | $\text{m}^2\cdot\text{kg}\cdot\text{s}^{-2}$    |
| power, radiant flux | watt   | W  | $\text{J/s}$            | $\text{m}^2\cdot\text{kg}\cdot\text{s}^{-3}$    |

## Determining Metabolic Rate

- See Energy File Part 3 Page 6

## Calculating Basal Metabolic Rate

| Age range | Males (MJ day <sup>-1</sup> ) | Females (MJ day <sup>-1</sup> ) |
|-----------|-------------------------------|---------------------------------|
| 0-3       | $0.255M - 0.226$              | $0.255M - 0.214$                |
| 3-10      | $0.095M + 2.07$               | $0.094M + 2.09$                 |
| 10-17     | $0.074M + 2.754$              | $0.056M + 2.898$                |
| 18-29     | $0.063M + 2.896$              | $0.062M + 2.036$                |
| 30-59     | $0.048M + 3.653$              | $0.034M + 3.538$                |
| >60       | $0.049M + 2.459$              | $0.038M + 2.755$                |

Where M is body mass in kg

## Example

Calculate the BMR for a man of 47 who weighs 85 kg

From table 2.1 in Energy File – Part 3

$$\text{BMR} = 0.048M + 3.653$$

$$= (0.048 \times 85) + 3.653$$

$$= 4.08 + 3.653$$

$$= 7.733 \text{ MJ day}^{-1}$$

## Exercise 1

Calculate the BMR for a woman of 26 who weighs 60 kg

## Exercise 1 - Solution

Calculate the BMR for a woman of 26 who weighs 60 kg

$$\begin{aligned}\text{BMR} &= 0.062M + 2.036 \\ &= (0.062 \times 60) + 2.036 \\ &= 3.72 + 2.036 \\ &= 5.756 \text{ MJ day}^{-1}\end{aligned}$$

## BMR Multipliers

| Activity          | Multiplier |
|-------------------|------------|
| Sitting           | 1.3        |
| Standing          | 1.5        |
| Washing, Dressing | 3.3        |
| Walking slowly    | 2.8        |
| Walking quickly   | 4.6        |
| Walking upstairs  | 8.3        |
| Light work        | 3.3        |
| Moderate work     | 5.4        |
| Strenuous work    | 7.6        |

## Exercise 2

- Calculate the energy expenditure of a 26 year old woman weighing 60 kg while she undertakes light work for a total of 7 hours

## Exercise 2 - Solution

We have already determined during exercise 1 that this woman's BMR is  $5.756 \text{ MJ day}^{-1}$

As she only works for 7 hours, we need to know what her hourly BMR is

$$\begin{aligned}\text{BMR} &= 5.756 / 24 \text{ MJ hour}^{-1} \\ &= 0.240 \text{ MJ hour}^{-1}\end{aligned}$$

## Exercise 2 – Solution

---

Over 7 hours her BMR =  $7 \times 0.240 \text{ MJ}$   
= 1.68 MJ

For light work, the multiplier is 3.3

So, the total energy expenditure during 7 hours  
of light work =  $3.3 \times 1.68 \text{ MJ}$

= 5.54 MJ

## Report Writing

---

- Some general advice

## Report Writing

---

- Preparation
- Presentation
- Use of tables and diagrams
- Referencing

## Preparation

---

- Read question carefully
- Answer the question given!
- Gather data
- Decide on structure
- Plan

## Presentation

---

- Structure
  - Headings and sub-headings
  - Paragraphs
- Use tables and diagrams
  - Where appropriate!
- Spacing
- Margins

## Tables and Diagrams

---

- Use to present and summarise data
- Good tables and diagrams can
  - make it easy for reader to understand information
  - save on word count

## Tables and Diagrams

- Think carefully about
  - information you want to convey
  - type and design
  - location
- Titles and labelling
  - always give a title
  - clear labelling

This is my travel diary for the w/c 12 June 2004

How can I simply it to present a summary of the information for a report on my travel pattern and associated energy consumption?

| Travel Diary w/c 12 June 2004 |  |                    |           |              |         |           |
|-------------------------------|--|--------------------|-----------|--------------|---------|-----------|
| Day                           | Purpose  | Mode               | Occupancy | Distance(km) | MJ km-1 | Energy(J) |
| Saturday                      | Taking daughter to school to catch coach for school trip | Car(Passat estate) | 2         | 8            | 1.9     | 15.2      |
| Saturday                      | Driving back from school                                 | Car(Passat estate) | 1         | 8            | 3.8     | 30.4      |
| Saturday                      | Shopping in Wigan town centre                            | Walking            | N/a       | 6            | 0.14    | 0.84      |
