

# MOTOR MOVER *plus*

The Wireless Remote Control  
Caravan Mover

Caravan Manoeuvring Made Easy

## QUICK AND EASY TO INSTALL AND FITS MOST CARAVANS

- \* Powerful - up to 1 in 4 slopes can be climbed and with two driven wheels difficult terrain can be negotiated even in the wet.
- \* Rotate caravan on its own axis - this is done by selecting one wheel forward and the other in reverse, alternatively select one wheel to stop and the other to go.
- \* Minimal reduction in ground clearance - just 30mm added below the chassis
- \* Supersoft start and stop - gives that necessary jerk free control.
- \* Holds the caravan on slopes - up or down slopes are not a problem.
- \* Automatic brake - release any control button for any reason and the caravan will stop.
- \* Removable motor, gearbox and rollers - great for security and winter storage; also reduces weight to only 17.5kgs when the mover is not required.
- \* Wireless remote control - position yourself where you need to be.
- \* One piece rollers for strength - no chipping or corrosion problems.
- \* One side roller engagement - caravan can be parked next to a wall.
- \* Automatic cut off - if the unit is not used for 20 minutes it will close down.
- \* Electrical protection - the control system protects itself from overloading, overheating and reverse polarity.
- \* Durable - stainless steel fasteners and stoved epoxy polyester paint for corrosion resistance.
- \* Back up lead provided - should radio interference be a problem.
- \* Uses 12 volt dc battery - most caravans have a leisure battery installed which can be used.
- \* Twin Axle version available - pulses the inside wheel during a turn.
