

*Cranes before a gibbous moon*

This is a display of the design which is encoded as a letter G in the font *Cranes\_before\_a\_gibbous\_moon*.

I like to think of the design as showing two cranes in a garden. There is an ornamental arch in the garden. In the distance is the gibbous moon.

The *Cranes\_before\_a\_gibbous\_moon* font was produced by the present author using the Alphabet Synthesis Machine which is an interactive artwork available in the following webspace.

<http://alphabet.tmemama.org>

The name for the font occurred to me while producing the font using the Alphabet Synthesis Machine. I was looking at the designs produced and noticed this particular glyph. There are 52 designs in the font, accessed using letters A to Z and a to z. The font also includes numerals and punctuation characters which have the same designs in each of the fonts produced using the Alphabet Synthesis Machine.

The *Cranes\_before\_a\_gibbous\_moon* font is available for free download from the following webspace.
