

Of Large Initial Letters

When one is setting some text
Using the Sonnet to a Renaissance Lady font -
One now has the opportunity to use a related font
To add large initial letters within the text -
This is by using the Sonnet Large Initials font -

The metrics of both fonts are the same -
So adding the large initial letters is straightforward -
Simply set the text using the Sonnet to a Renaissance Lady font
Then change the font for some or all of the capital letters -
Perhaps changing the colour of those letters as well -

Hopefully these two fonts together
Will be used to produce graceful designs -
Perhaps here the lighter colour of the large initials
Will interact with their wider lines
So as to produce pleasing prints of text -
